DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 22-52 have been considered but are moot in view of the new ground(s) of rejection.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 22-32 and 43-52 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-16 and 29-39 of U.S. Patent No. 7,295,423. Although the conflicting claims are not identical, they are not patentably distinct from each other because all the claimed limitations of the present application are recited in the claims of the U.S. Patent No. 7,295,423 and therefore the claims 1-16

Art Unit: 2831

and 29-39 of the Patent No. 7,295,423 anticipate the claims 22-32 and 43-52 of the present application.

Claims 33-42 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-28 of copending Application No. 10/817,700. Although the conflicting claims are not identical, they are not patentably distinct from each other because all the claimed limitations of the present application are recited in the claims of copending Application No. 10/817,700 and therefore the claims 1-28 of the copending Application anticipate the claims 33-42 of the present application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
